FEATURES

Temperature control

- With stainless steel outer tube, high grade heater elements, and updated integrated temperature automatic controller.
- Temperature can be set by the regulation button on the handle directly.
- Having many outstanding merits, such as quick temperature rising, accurate controlling, leakage protection design, and beautiful appearance.
- The most special is that it can protect the PCB and devices when soldering.
- Stable soldering temperature and high power heater elements.
- Quick heat-up and good temperature reduction compensation.
- Long life lead free soldering tip and safety reliable grounding device.
- To solder after powered on for 45 seconds.
- The temperature regulation button on the handle indicates the temperature.
- The working temperature can be set in the range between 200°C and 500°C freely.
